

flourishing destinies

Lindsey N. Godwin is an Assistant Professor of Management in the College of Business, Morehead State University and received her Ph.D. in Organizational Behavior at the Weatherhead School of Management, Case Western Reserve University.

Her research interests include leadership development, morality and social responsibility in business, and the role of collaborative technologies in creating positive organizational development and whole-system's change. During her time at Case Western Reserve, she worked as a research associate for the Center for Business as Agent of World Benefit (BAWB).

In collaboration with iCohere she helped organize and lead three international online conferences for the Center, which each brought together hundreds of individuals from countries all over the globe to explore how business can be a force for positive social change.

Building on her experiences working with iCohere and her work with David Cooperrider, the leading thought leader on Appreciative Inquiry (AI), she has been a partner in the development and facilitation of OvationNet's experiential workshops that focus on teaching the foundations of AI.

Additionally, she is the co-knowledge manager of the AI Commons, served as a co-chair for the 2007 International Conference on AI in Florida and is currently a co-chair for the upcoming 2009 World AI Conference in Nepal.
